April 16 Meeting
(at the new Learning Gate Charter School)

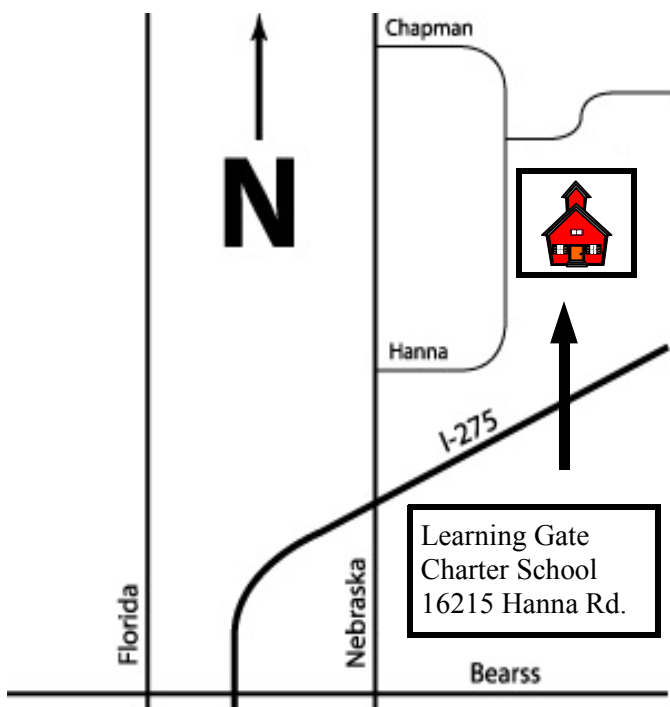

Native Trees in Landscaping

By Richard Bailey

Our native landscapes are often built around large trees which form a sheltering canopy for an understory of smaller trees, shrubs, and herbaceous ground-covering plants. We want our canopy-forming trees to grow large and healthy, but many factors affect their growth and health. Drawing on his

experience as a consulting forester and Certified Arborist, Richard Baily will explain some of the variables that affect the growth of trees in the landscape.

Richard earned a B.S. in Forest Resources and Conservation at the University of Florida in 1977. He has held forestry related positions at the Florida Division of Forestry and at Tampa Electric, and now has his own consulting firm.

Message from the President

The USF Botanical Garden Plant Festivals are the chapter's major fund-raising events. If you haven't visited our area recently - please stop by this weekend.

Hint - it is the first area on your left as you enter the Botanical Garden. I want to pay a special thanks to Sally Sun, who tirelessly organizes these events twice a year. Sally's commitment to the Plant Sale is truly exemplary and I am grateful for her dedication to these events.

Don't miss the next meeting because you will learn all about using native trees in your landscape and keeping them healthy. Along with a great program, you can pick up a new Suncoast chapter brochure titled **Cypress Mulch: why kill a tree to grow a flower?** The brochure was written by Barbara Waddell and the Ruskin Pepper Patrol. Susan Johnston drew the illustrations and Mariella Johns Smith designed the brochure.

The brochure makes a very convincing case for using alternative mulches and we hope to distribute this brochure widely across the state.

George Kish

Native trees (cont. from page 1)

For over fifteen years he managed a large operation in palm cultivation, and he has designed and installed landscapes for residential and commercial properties. Since 1995 he has operated a consulting company that addresses tree protection during construction, insect and disease identification, damage claims, appraisals, management plans for street trees, and hazard tree identification. He has lent his expertise to a wide variety of committees, boards, and councils.

USF Botanical Garden Spring Plant Festival

By Sally Sun

The USF Botanical Garden Spring Plant Festival takes place April 12 and 13. Hopefully, you have already signed-up to help. You can still call Sally Sun at (813) 935-1312 to help out. The USF Botanical Garden Plant Festival takes place Saturday, April 12, from 8 AM to 4 PM, and Sunday, April 13, from 9 AM to 3 PM. This is a great opportunity to meet fellow gardeners, replace the native plants lost to the frost, and learn about native plants. We appreciate your participation.

Florida Native Plant Society Membership Application

Membership in the Florida Native Plant Society enables you to receive their wonderful quarterly magazine The Palmetto. Joining the FNPS also entitles you to membership privileges in the Suncoast Native Plant Society, Inc. and a subscription to their monthly newsletter *The Suncoast Grapevine*. Contact the membership chair, George Kish at (813) 920-0853.

Detach and mail to: Suncoast Native Plant Society, P.O. Box 82893, Tampa, FL 33682-2893

Open Studio with Susan Johnston

Susan Johnston, Suncoast chapter member and local artist, will hold an open studio at her house, 507 Bon Aire Avenue, Temple Terrace on Saturday, May 3, 2003 from 11 AM to 7 PM. Susan has contributed botanical drawings to the Suncoast chapter newsletter and she drew the sketches for the brochure, Alternatives to Cypress Mulch, which will be available at the April meeting. If you are not familiar with Susan's work - it is worth the trip to see her wonderful drawings of native plants. She will also be selling works during the Open Studio event. For more information or directions, please call Susan at 984-1322 or visit her website at:

Oct 15 Does Compost Just Happen? by Ardell O'Neal

Nov 19 TBA

Conference Committee

The SNPS Board of Directors has established a conference committee to determine the capacity of the chapter and the area to host the annual FNPS meeting in 2007. Ameen Bailey has been appointed as chair. The current objectives of the committee are to locate possible location to host a conference, determine cost and manpower needed. Another item to be researched will be the possibility of a joint conference, and if so with what group. If you have any comments or are interested in joining this committee please contact Ameen Bailey at aturtle2c@aol.com or 863-206-3439.

FNPS Eco-Action Alert

If you would like to be informed of calls for action on a wide variety of Florida and national environmentally sensitive subjects, consider subscribing to the Eco-Action Alert List. Individuals act on their own, NOT in the name of FNPS. If you would like to subscribe to the Eco-Action Alert, please send an email to info@fnps.org.

Program for May

By Harriett Wright

Those of us who are engaged in creating native gardens know how rewarding, but also how difficult, it can be. Last summer many of our members shared their frustrations and triumphs in a member participation program. It was such a success that we'd like to do it again, this May. If you have successes, failures, lessons learned the hard way, and/or brilliantly successful inspirations that you're willing to share, please consider taking part in the May meeting. Photos and/or slides would be nice, but aren't necessary. This will be an excellent opportunity for all of us to get new ideas and to learn from one another.

PLANT PROFILE

Common name: Cutleaf evening primrose
Botanical name: *Oenothera laciniata* Hill
Family: ONAGRACEAE (Evening primrose Family)

Plant habit: low and spreading herb

Size: stems 1-2 ft. long

Leaves: 1-2 in. long, alternate, margins usually deeply lobed, rarely sub-entire

Flower: yellow, about 1 in. across, 4 petals, 4 sepals, 4 stigmas, 8 stamens, sessile in the upper leaf axils

Fruit: a cylindric capsule developing below the flower (inferior ovary)

Flowering time: spring, summer and sporadically throughout the year; the flowers opening in the evening and turning a copper color as they close in the heat of the next day

Habitat: dry soil

Distribution: central and north Florida

Hardiness zones: cold hardy

Availability: Some native plant nurseries

Light: full sun

Water: Drought tolerant once established

Propagation: by seed
